

Ideation Phase

Define the Problem Statements

Date: 18 June 2026

Project Name: Online Complaint Registration System

Problem Statement (PS-1)

Field	Description
I am (Customer)	A user who wants to register a complaint regarding a service, facility, or issue
I'm trying to	Submit my complaint quickly and track its progress
But I have to	Visit offices physically, fill paper forms, or make repeated follow-up calls
Because	There is no centralized online complaint management system available
Which makes me feel	Frustrated, inconvenienced, and uncertain about the status of my complaint

Problem Statement (PS-2)

Field	Description
I am (Customer)	An administrator responsible for managing and resolving complaints
I'm trying to	Organize, monitor, and resolve complaints efficiently
But	Complaints are received through multiple channels and managed manually
Because	There is no automated complaint tracking and management system
Which makes me feel	Overloaded, inefficient, and unable to monitor complaint resolution effectively

Problem Statement (PS-3)

Field	Description
I am (Customer)	A department manager responsible for ensuring service quality
I'm trying to	Monitor complaint trends and improve service delivery
But	Complaint records are scattered and difficult to analyze
Because	There is no centralized platform for complaint analytics and reporting
Which makes me feel	Unable to make data-driven decisions and improve operational efficiency

Conclusion

The identified problem statements highlight the challenges faced by users, administrators, and management teams in traditional complaint handling systems. The Online Complaint Registration System aims to address these challenges by providing a secure, efficient, and user-friendly platform for complaint registration, tracking, management, and resolution.

The system improves transparency, accountability, communication, and overall user satisfaction while reducing manual effort and paperwork.
