

Project Design Phase

Problem – Solution Fit Template

Date: 18 June 2026

Project Name: Online Complaint Registration System

Customer Segment

- Citizens seeking complaint registration services
 - Students reporting academic or facility issues
 - Employees raising workplace grievances
 - Customers reporting service-related problems
 - Administrators responsible for complaint management
-

Customer Problems

Problem 1

Users face difficulties registering complaints through traditional manual methods.

Problem 2

Users cannot easily track the progress of their complaints.

Problem 3

Administrators struggle to manage complaints efficiently due to scattered records.

Problem 4

Lack of transparency and communication during the complaint resolution process.

Problem 5

Delayed complaint resolution due to manual workflows and paperwork.

Existing Alternatives

- Physical complaint registers
 - Paper-based complaint forms
 - Email complaints
 - Telephone support systems
 - Manual complaint tracking spreadsheets
-

Proposed Solution

The Online Complaint Registration System provides a centralized web-based platform where:

- Users can register complaints online.
 - Users can track complaint status in real time.
 - Administrators can manage and resolve complaints efficiently.
 - The system maintains complaint history and records.
 - Users receive complaint status updates and notifications.
 - Administrators can monitor complaint statistics through a dashboard.
-

Key Benefits

- Faster complaint registration
 - Reduced paperwork
 - Real-time complaint tracking
 - Improved transparency
 - Better communication between users and administrators
 - Efficient complaint management
 - Centralized data storage
 - Enhanced user satisfaction
-

Problem – Solution Fit

Customer Problem	Proposed Solution
Manual complaint registration process	Online complaint submission portal
Difficulty tracking complaint progress	Real-time complaint status tracking

Customer Problem	Proposed Solution
Scattered complaint records	Centralized complaint database
Lack of communication	Notification and status update system
Delayed complaint resolution	Automated complaint management workflow

Conclusion

The Online Complaint Registration System effectively addresses the major challenges faced by users and administrators in traditional complaint management processes. The proposed solution directly aligns with user needs by providing online complaint registration, complaint tracking, notification management, and centralized complaint administration.

The system improves transparency, efficiency, accountability, and overall user satisfaction while reducing manual effort and paperwork.
