

Project Design Phase

Proposed Solution Template

Date: 18 June 2026

Project Name: Online Complaint Registration System

S.No	Parameter	Description
1	Problem Statement (Problem to be Solved)	Users face difficulties in registering and tracking complaints due to manual complaint handling processes, delayed responses, lack of transparency, poor communication, and inefficient complaint management systems.
2	Idea / Solution Description	Online Complaint Registration System is a MERN Stack based web application that allows users to register complaints online, track complaint status, receive notifications, and manage complaint history. Administrators can review complaints, update complaint status, resolve issues, and monitor complaint activities through a centralized dashboard.
3	Novelty / Uniqueness	The platform combines complaint registration, complaint tracking, notification management, and administrative monitoring within a single system. It provides secure authentication, centralized complaint management, real-time updates, and role-based access control.
4	Social Impact / Customer Satisfaction	The solution improves transparency, accountability, and efficiency in complaint handling. Users can easily submit complaints and monitor progress, while administrators can manage complaints effectively,

S.No	Parameter	Description
5	Business Model (Revenue Model)	resulting in higher user satisfaction and trust. Revenue opportunities may include subscription plans for organizations, premium complaint management services, institutional partnerships, customized enterprise solutions, and analytics services for organizations.
6	Scalability of the Solution	The system can be expanded to support multiple organizations, mobile applications, AI-based complaint categorization, automated complaint routing, analytics dashboards, email and SMS notifications, and multilingual support in future versions.

Conclusion

The Online Complaint Registration System provides an effective, scalable, and user-friendly solution for modern complaint management. The platform enables efficient complaint registration, tracking, monitoring, and resolution while improving transparency, communication, and overall user satisfaction.

The system creates value for users, organizations, institutions, and administrators by reducing manual effort and ensuring efficient complaint handling through a centralized digital platform.
